## FARM MORE LAND

Cultivate for the Soldier at the Front.

This question of conservation of food has become so agitated by those who have a knowledge of what it means in the preservation of life, who have made a study of the food conditions, and the requirements of the country, that it is beginning to arouse the entire nation. The economist whose duty it is to study the output and compare it with the consumption, sees a rapidly creeping 'up of one on the other, and when the appetite of consumption gets a headway on the output, where will the nation be? It is time the people were aroused, for there is danger ahead unless the intelligence of the people is awakened to the facts. The crop of 1917 will be less than an average one, and see the work it has to perform. It has to feed the man producing it, and he is of less efficiency today than a year ago. His strength has been reduced by the drawing away of the thousands from the farms, who are now in the ranks of the consumer instead of in that of the producer. There is an inverse ratio here that can only be understood when confronted with the appalling figures presented by those in charge of the conservation work. The army has to be fed, dependents cared for, the navy has to have provisions, and we cannot sit idly by and see the women and children of the countries across the sea starve. There is such a great call for active participation in the matter of providing food, that those who are left at home in charge of this work have a responsibility placed upon them fully as great as has the man at the front who has gone out to protect the homes, the sanctity and the honor of those who are left behind. The producer should think only of this; there should be economy, not only of labor. Every acre of available land should be producing. Advantage should be taken of every daylight hour. It must not be a case of how much can we make. It must be a case of "fight" with those who have gone overseas, but in our way, fight to win the war. Where that spirit prevails will be found the spirit of the patriotic American. There is no difficulty in securing land in any of the states. It may be rented on easy terms or purchased at low prices, and there should be little difficulty arranging with bankers to get the necessary funds to carry on operations. Should you not be able to get what you want in your own state, Western Canada offers an immense wide field for operations at the lowest possible cost, and Americans are welcomed with open arms. Homesteads of 160 acres each may be had on easy conditions, and other lands may be purchased at low prices on easy terms. The yields of all kinds of small grains are heavy. The prospects for a 1917 crop are excellent, and it looks today as if there would be as good a return as at any time in the past, and when it is realized that there have been yields of forty and forty-five bushels of wheat over large areas this should be encouraging. Now that the two countries are allies and the cause is a common one there should be no hesitation in accepting whatever offer seems to be the best in order to increase the production so necessary, and which should it not be met, will prove a serious menace. Particulars as to Canadian lands, whether for purchase or homestead, may be had on application to any Canadian Government Agent.—Advertisement.

THREE GERMAN FLYERS FALL IN  
DUELS WITH BRITISH  
MACHINES.

Western Newspaper Union News Service.

London, July 9.—The second descent upon London by a squadron of airplanes was made Saturday morning between 9 and 10 o'clock, when the business section of the metropolis was most crowded.

Although the German contingent was larger, more daring, more deliberate in its movements, and descended much lower than on the visit of June 13, the number of killed and wounded was, according to the first official roll, roughly one-third the previous casualty list. The destruction of property may have been greater but that is impossible to estimate.

The flight of the Germans over London lasted about twenty minutes. British airmen engaged the enemy for several minutes over the metropolis, and anti-aircraft guns were firing briskly, dotting the sky with shrapnel puffs, but without success so far as concerned the destruction of any of the twenty or more machines which constituted the invading force.

The enemy's bomb-carrying planes were in the center of the formation, surrounded and protected by fast fighting scout machines.

"Lord French reports that the total casualties reported by the police follow:

Killed—Metropolitan area: Men, 27; women, 4; children, 3; total, 34. Isle of Thanet, men, 1; women, 2; total, 3. Total killed, 37.

Injured: Metropolitan area: Men, 74; women, 29; children, 36; total, 139. Isle of Thanet, women, 1; children, 1; total, 2. Total injured, 141.

"One enemy machine downed by the royal flying corps fell into the sea off the mouth of the Thames. Six others were shot down.

The admiralty was able to report that naval airmen who followed them to sea brought down three machines.

Berlin.—In a renewal of their attack at Stanislaw, south of Halicz, the key to Lemberg, Russian troops have gained ground.

German efforts to dislodge the Russians at Godov and Konichy failed.

Efforts of the crown prince again to force back the French north of the Aisne to regain the line of the Chemin des Dames failed. The German losses were heavy.

East of Cerny Gen. Petain has enlarged the ground captured July 1, and on the left bank of the Meuse near Verdun the French have carried three strong salients.

Important developments are expected in Germany in a few days. The Kaiser hurried to Berlin, from Vienna, to confer with Hindenburg and Ludendorff.

Wilson has issued a proclamation for government control of American exports.

Date Not Set for Miners' Strike.

Leadville.—After a three-hour session Saturday night the executive board of the miners' union adjourned without fixing a date for the calling of a strike here.

SEIZE AND BUY SPIRITS IN BOND.

Senate Favors National Prohibition During War, With the Exception of Beer and Wine.

Washington.—The Senate brought the prohibition fight practically to an end late Saturday afternoon, voting 45 to 37 to substitute the Robinson administration amendment as amended for the House bone-dry prohibition. The Robinson amendment as amended provides:

First.—For the flat prohibition of the use of foods, feeds and fruits in the manufacture of distilled beverages.

Second.—For the commandeering of all distilled spirits in bond at cost plus 10 per cent profit to the distillers.

Third.—For the exemption of distillers from all taxes on spirits commandeered.

Fourth.—For the prohibition of the importation of liquor.

It completely ignores the question of prohibiting beer and wine.

Immediately after the adoption of the amendment, Senator Simmons, chairman of the finance committee, moved to recommit the \$1,670,000,000 war revenue bill.

Jerome Miners Refuse to Strike.

Jerome, Ariz., July 9.—Members of the Jerome local of the International Union of Mine, Mill and Smelter Workers, rejected Saturday by a vote of 470 to 194 a proposal to submit to the membership a strike vote on the question of joining with the Metal Mine Workers Industrial Union of the Industrial Workers of the World, in the strike declared by the latter organization in the Jerome copper district.

## WHISTLER WAS MOST ACTIVE

Observer Marvelled at Great Energy Displayed by the Famous Artist in His Studio.

The studio was surprisingly different from the room he previously used in Lindsay row, and entirely unlike the studios usually occupied by other artists, says Hay in "Memories of Whistler." I remember a long, not very lofty room, very light, with windows along one side; his canvas beside his model at one end, and at the other, near the table which he used as a palette, an old Georgian looking-glass, so arranged that he could see his canvas and model reflected in it. Those who use such a mirror (as he did constantly) will know that it is the most merciless of critics.

I marvelled then at his extraordinary activity, as he darted backward and forward to look at both painting and model from his point of view at the extreme end of the long studio. He always used brushes of large size with very long handles, three feet in length, and held them from the end with his arms stretched to their full extent. Each touch was laid on with great firmness, and his physical strength enabled him to do without the assistance of a mahlstick, whilst the distance at which he stood from the canvas allowed him to have the whole of a large picture in sight and so judge the correct drawing of each touch.

## Muddled.

The day was drawing to a close. Judge, jurors, witnesses and lawyers—all were growing weary. Counsel for the prosecution was cross-examining the defendant.

"Exactly how far is it between the two towns?" he asked at length.

For some time the man stood thinking, then:

"About four miles as the cry flows," came the answer.

"You mean as the flow cries!" retorted the man of law.
